DETAILED ACTION

1. The previous election requirement is withdrawn in that claim 10 was omitted. Applicants are correct that claim 10 was inadvertently omitted which appears to have caused great confusion for applicants, which the examiner apologizes for in this action. The below should clarify the election requirement which covers all of claims 1-4 and 6-10 with claim 5 having been canceled.
2. Applicants' request the authority for the examiner to make an election requirement after an office action. See MPEP 811.02 which states that

"37 CFR 1.142(a) provides that restriction is proper at any stage of prosecution up to final action, a second requirement may be made when it becomes proper, even though there was a prior requirement with which applicant complied. Ex parte Benke, 1904 C.D. 63, 108 O.G. 1588 (Comm'r Pat. 1904).

3. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A: Figures 1;

Species B: Figures 2.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims appears to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicants state that all claims read on Figure 1. Claims 3, 6 and 8 recite the features of a "capacitive element" and related subject matter directed to Figure 2 rather than Figure 1. See MPEP 819.01 "Office May Waive Election and Permit Shift" should applicants desire to shift to election of Figure 2 which would be acceptable.

Art Unit: 3683

Only those claims that read on the elected embodiment should be indicated as being readable on the elected embodiment. It would be acceptable for applicants' to add additional claims to the elected embodiment if needed.
